

Household Battery Recycling

Use the chart below to determine which household batteries you can easily recycle, usually at no or low cost. Lead acid vehicle batteries MUST be recycled under state law and can be returned to any car battery dealer at no cost to you. Other batteries, listed as "Difficult to recycle," may be recyclable but at a higher cost. If recycling is not a viable option, you can throw these batteries in the trash.

Where to Recycle? Call your local recycling program for information on where to take batteries for recycling, or go to dnr.wi.gov and search "markets directory" to find a recycler.
